

## blueExtrusion BEX12

Compact Extruder for the aeration free melting from Hot Melt

Modular design series available with up to four pumps. Integrated water cooler unit for the extruder inlet. Outstanding accessibility from all components. Built in sensors for process control.

fig. blueEX 12-2P

No clumping form adhesive granulates due to water cooling in extruder inlet

Granulate volume is monitored with integrated alarm at empty level

Outstanding accessibility from all sides. Modular design

Water cooler for extruder inlet is integrated in unit

Exact metering with up to four separate adjustable gear pumps

Technical data	BEX 12
Heating capacity	15kW
Melting capacity	max 12kg/h
Quantity pumps	1 - 4
Quantity output ports	1 - 4
Temperature range	50 - 250°C
