

blueExtrusion BEX 8

Compact Extruder for the aeration free melting from Hot Melt

Modular design series available with one or two pumps. Integrated water cooler unit for the extruder inlet. Outstanding accessibility from all components. Built in sensors for process control.

fig. blueEX 8-2P

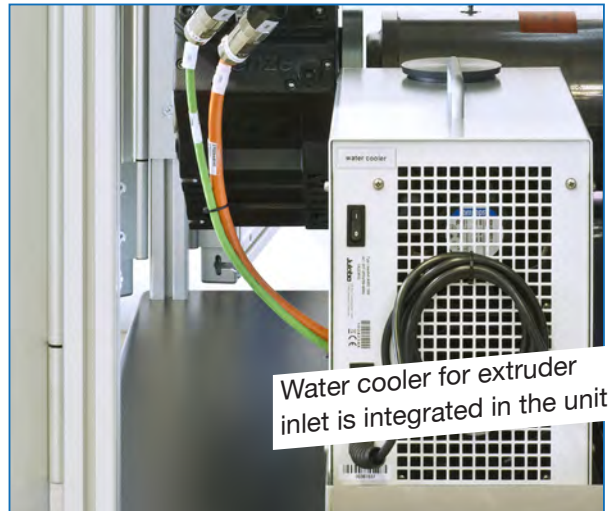

No clumping from adhesive granulates due to water cooling in extruder inlet

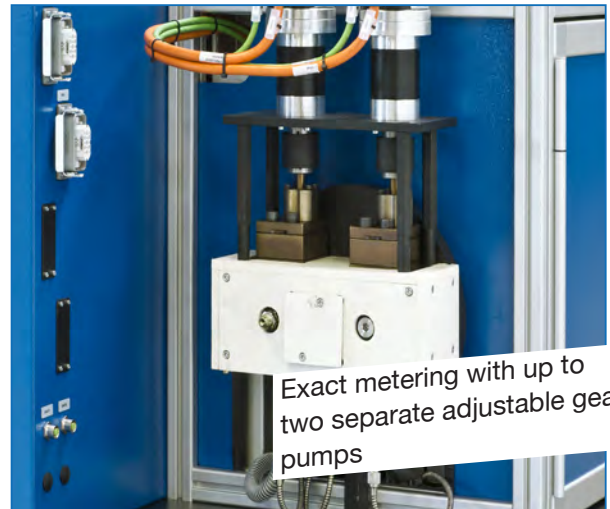

Granulate volume is monitored with integrated alarm at empty level, option automatic filler

Outstanding accessibility from all sides. Modular design

Water cooler for extruder inlet is integrated in the unit

Exact metering with up to two separate adjustable gear pumps

Technical data	BEX 8
Heating capacity	12kW
Melting capacity	max 8 kg/h
Quantity pumps	1 or 2
Quantity output ports	1 or 2
Temperature range	50-250°C
